

Uddeling af  
**Danmarks Geologipris 2022**

**31. oktober, kl. 17, 2023**

**Aud. A, IGN, Øster Voldgade 10, 1350 København K**

# Untangling drivers in deep time biodiversity change

**David A.T. Harper**

Fossils in the mountains:  
their role in understanding the relationship between biodiversity  
and geography during the Early Palaeozoic

**Emma U. Hammarlund**

What if the rise of animals was NOT triggered by high or low oxygen...  
but by fluctuations between the two?

**Nicolas R. Thibault**

Challenges and success in the astronomical  
calibration of pre-Cenozoic times

**Tais W. Dahl**

The late Cambrian SPICE event - testing rates of change in the Earth System

**Christian Mac Ørum Rasmussen**

What is so special about the Ordovician?
