

Content, vol. 60

Wolfgang Kalkreuth, Claus Andreasen, Henrik I. Petersen & Lars Stemmerik:
The petrology and provenance of coal artifacts from Thule settlements
in north-eastern Greenland 1

Jan Audun Rasmussen & Finn Surlyk:
Rare finds of the coiled cephalopod *Discoceras* from the Upper Ordovician
of Bornholm, Denmark 15

Tod E. Waight, Dirk Frei & Michael Storey:
Geochronological constraints on granitic magmatism, deformation,
cooling and uplift on Bornholm, Denmark 23

Bodil Wesenberg Lauridsen, Morten Bjerager & Finn Surlyk:
The middle Danian Faxe Formation – new lithostratigraphic unit and a rare
taphonomic window into the Danian of Denmark 47

Tillie M. Madsen & Jan A. Piotrowski:
Genesis of the glaciotectionic thrust-fault complex at Halk Hoved,
southern Denmark 61

Bulletin of the Geological Society of Denmark

VOLUME 60 | DECEMBER 2012 | COPENHAGEN

Bulletin of the Geological Society of Denmark

is published by the Geological Society of Denmark
(DGF, Dansk Geologisk Forening), founded in 1893

Chief editor

Lotte Melchior Larsen, Geological Survey of Denmark and Greenland (GEUS), Øster Voldgade 10, DK-1350 Copenhagen K, Denmark.
Tel: +45 38142252; Fax: +45 38142250;
E-mail: lml@geus.dk

Scientific editors

Lars B. Clemmensen, Department of Geography and Geology, University of Copenhagen, Øster Voldgade 10, DK-1350 Copenhagen K, Denmark.
Tel: +45 3532 2476; E-mail: larsc@geo.ku.dk
(clastic sedimentology, sedimentary basins and palaeoclimatology)

Ole Graversen, Department of Geography and Geology, University of Copenhagen, Øster Voldgade 10, DK-1350 Copenhagen K, Denmark.
Tel: +45 3532 2447; E-mail: oleg@geo.ku.dk
(structural geology and tectonics)

Michael Houmark-Nielsen, Natural History Museum of Denmark, University of Copenhagen, Øster Voldgade 5-7, DK-1350 Copenhagen K, Denmark.
Tel: +45 3532 4344; E-mail: michaelhn@snm.ku.dk
(Quaternary geology)

Jesper Milàn, Geomuseum Faxe, Østsjællands Museum, Østervej 2, DK-4640 Faxe, Denmark.
Tel: +45 2463 6348; E-mail: jesperm@oesm.dk
(palaeontology)

Lars Nielsen, Department of Geography and Geology, University of Copenhagen, Øster Voldgade 10, DK-1350 Copenhagen K, Denmark.
Tel: +45 3532 2454; E-mail: ln@geo.ku.dk
(geophysics)

Erik Thomsen, Department of Geoscience, University of Aarhus, Høegh-Guldbergs Gade 2, DK-8000 Aarhus C, Denmark. Tel: +45 8942 2627;
E-mail: erik.thomsen@geo.au.dk
(palaeontology and stratigraphy)

Henrik Tirsgaard, Mærsk Olie og Gas AS, Esplanaden 50, DK-1263 Copenhagen K, Denmark.
Tel: +45 6120 9140;
E-mail: Henrik.tirsgaard@maerskoil.com
(carbonate sedimentology, petroleum geology and sedimentary basins)

J. Richard Wilson, Department of Geoscience, University of Aarhus, Høegh-Guldbergs Gade 2, DK-8000 Aarhus C, Denmark. Tel: +45 2532 1169;
E-mail: jrw@geo.au.dk
(igneous petrology and geochemistry)

The *Bulletin* publishes contributions of international interest in all fields of geological sciences, with a natural emphasis on results of new work on material from Denmark, the Faroes and Greenland. Contributions based on foreign material may also be submitted to the *Bulletin* in cases where the author is a member of the Society. The rate of publishing is one volume per year. All articles are published as pdf-files immediately after acceptance and technical production. A paper edition of each volume is issued at the end of the year and is circulated to libraries only.

Scientific editing and reviewing is done on unpaid collegial basis and technical production expenses are covered by the membership fees.

The bulletin is freely accessible on the web page of the Geological Society of Denmark:
<http://2dggf.dk/publikationer/bulletin/index.html>.

Instructions to authors:

See inside the back cover and also:
<http://2dggf.dk/publikationer/bulletin/vejledning.html>

Cover: The Faxe limestone quarry is a famous fossil-hunter locality which over the years has yielded thousands of well-preserved fossils from the coral and bryozoan mound complexes exposed there. Faxe has now given name to a new geological formation, the Faxe Formation (see this volume pp 47–60: Lauridsen, B.W., Bjerager, M. & Surlyk, F: The middle Danian Faxe Formation – new lithostratigraphic unit and a rare taphonomic window into the Danian of Denmark). A particular facies within the mounds is described as the Baunekule facies which presents exceptionally well-preserved fossils. However, the localities with the Baunekule facies have now all been quarried away. The picture shows the quarry in 2012, viewed from NW; the locality called ‘Ravns næse’, shown on p 50 in a photo from 1908, was located approximately between the two limestone heaps in the right background, and the locality ‘Stationsvej’ was situated about in the middle of the present lake in the right foreground. Photo: Jesper Milàn, Geomuseum Faxe.

Instructions to authors

The *Bulletin* publishes articles normally not exceeding 16 printed pages, notes not longer than 4 pages, and short contributions of maximum 1 printed page. Longer articles may be published at the discretion of the editor, but it is advisable to consult the editor before submitting long manuscripts. Short contributions may be comments on previously published articles, presentation of current scientific activities, short scientific notes, or book reviews.

Manuscripts with complete sets of illustrations, tables, captions, etc., should be submitted electronically to the chief editor (lml@geus.dk). The **main text** with references and figure captions should be either in Word or pdf format, **figures** should be in either pdf, jpeg, or tiff format, and **tables** should be in Word text format, i.e. written in lines with tab spacing between table columns. “Word tables” are discouraged because they are not re-formatted easily. Consult the editor before submitting other formats.

Manuscripts will be reviewed by two referees; suggestions of referees are welcome. Articles will be published approximately in the order in which they are accepted for publication. The final decision on whether or not a manuscript will be accepted for publication rests with the chief editor, acting on the advice of the scientific editors.

Manuscript

Language – Manuscripts should be in English. Authors who are not proficient in English should ask an English-speaking colleague for assistance before submission of the manuscript.

Title – Titles should be short and concise, with emphasis on words useful for indexing and information retrieval. An abbreviated title to be used as running head must also be submitted.

Abstract – An abstract in English must accompany all papers. It should be short (no longer than 250 words), factual, and stress new information and conclusions rather than describing the contents of the manuscript. Conclude the abstract with a list of key words.

Main text – Use 1.5 or double spacing throughout, and leave wide margins. Italics should be used only in generic and species names and in some Latin abbreviations (e.g. *c.*, *et al.*, *ibid.*, *op. cit.*).

Spelling – Geological units named after localities in Greenland, formal lithostratigraphical units and intrusions named after localities in Greenland remain unchanged even if the eponymous locality names have since been changed in accordance with modern Greenlandic orthography.

References to figures, tables and papers – References to figures and tables in the text should have the form: Fig. 1, Figs 1–3, Table 3 or as (Smith 1969, fig. 3) when the reference is to a figure in a cited paper.

References to papers are given in the form Smith (1969) or (Smith 1969). Combined citations by different authors are separated by a semicolon; two or more papers by same author(s) are separated by commas. Citations are mentioned chronologically and then alphabetically. Use ‘*et al.*’ for three or more authors, e.g. Smith *et al.* (1985).

Reference list

Use the following style:

Smith, A.A. 1989: Geology of the Bulbjerg Formation. *Bulletin of the Geological Society of Denmark* 38, 119–144. [Note that name of journal is given in full].
Smith, A.A., Jensen, B.B. & MacStiff, C.C. 1987: Sandstones of Denmark, 2nd edition, 533 pp. New York: Springer Verlag. [For more than 10 authors, use first author followed by *et al.*].
Smith, A.A., Jensen, B.B. & MacStiff, C.C. 1992: Characterization of Archean volcanic rocks. In: Hansen, D.D. *et al.* (eds): *Geology of Greenland*. Geological Survey of Denmark and Greenland *Bulletin* 40, 1397–1438. [More than three editors – therefore *et al.* form is used].

Sorting – Danish letters æ, ø and å (aa) are treated as ae, o and a (aa), respectively.

References are sorted by:

- 1: Alphabetically by the first author’s surname
- 2: Papers by one author: two or more papers are arranged chronologically
- 3: Papers by two authors: alphabetically after second author’s name. Two or more papers by the same two authors: chronologically.
- 4: Papers by three or more authors: chronologically. Papers from the same year are arranged alphabetically after second, third, etc. author’s name.

Authors themselves are responsible for the accuracy and completeness of their references. If incorrect references are found, the manuscript will be returned to the author for complete rechecking. The reference list must include all, and only, the references cited in the paper (including figures, tables etc).

Illustrations

May be prepared in either black and white or colour. There is no colour charge. Horizontal illustrations are much to be preferred. Size of smallest letters in illustrations should not be less than 5.5 pt. Remember scale.

All figures (including photographs) should be submitted in electronic form ready for direct reproduction, i.e. having the dimensions of the final figure with a standard resolution of 300 dpi for photographs. Preferred formats are pdf, tiff and jpg.

Size – The width of figures must be 82 mm, 125 mm or 171 mm. Maximum height is 223 mm.

Captions – Captions to figures, tables and plates must be delivered on separate pages.

Proofs

Proofs – Authors receive page proofs of the article after technical set-up. The cost of any alterations against the final manuscript will be charged to the author.
