Bulleting of the Geological Society of Denmark
is published by the Geological Society of Denmark (DGF, Dansk Geologisk Forening), founded in 1893

Chief editor
Lotte Melchior Larsen, Geological Survey of Denmark and Greenland (GEUS), Øster Voldgade 10, DK-1350 Copenhagen K, Denmark. Tel: +45 91338899; E-mail: lml@geus.dk

Co-editor: Gunnar Krarup Pedersen, Geological Survey of Denmark and Greenland (GEUS), Øster Voldgade 10, DK-1350 Copenhagen K, Denmark. Tel: +45 21252733; E-mail: gkp@geus.dk

Scientific editors
Lars B. Clemmensen, Department of Geosciences and Natural Resource Management, University of Copenhagen, Øster Voldgade 10, DK-1350 Copenhagen K, Denmark. Tel: +45 35322449; E-mail: lars@ign.ku.dk; (clastic sedimentology, sedimentary basins and palaeoclimatology).
Nicola Krog Larsen, Department of Geoscience, Aarhus University, Høegh-Guldberg Gade 2, DK-8000 Aarhus C, Denmark. Email: nl@geo.au.dk; (palaeontology).
J. Richard Wilson, Department of Geoscience, University of Aarhus, Høegh-Guldberg Gade 2, DK-8000 Aarhus C, Denmark. Tel: +45 23321169; E-mail: jrw@geo.au.dk; (igneous petrology and geochemistry).

The Bulletin publishes contributions of international interest in all fields of geological sciences on results of new work on material from Denmark, the Faroes and Greenland. Contributions based on foreign material may also be submitted to the Bulletin if the subject is relevant for the geology of the area of primary interest. The rate of publishing is one volume per year. All articles are published as pdf-files immediately after acceptance and technical production.

Scientific editing and reviewing are done on an unpaid collegial basis; technical production expenses are covered by the membership fees.

The bulletin is freely accessible on the web page of the Geological Society of Denmark: www.2dgf.dk/publication/bulletin/index.html

Instructions to authors
See also www.2dgf.dk/publication/bulletin/vejledning.html

The Bulletin publishes articles normally not exceeding 30 printed pages, and short contributions not longer than 4 pages. Longer articles and monographs are also published, but in this case it is advisable to consult the chief editor before submitting long manuscripts. Short contributions may be comments on previously published articles, presentation of current scientific activities, short scientific notes, or book reviews.

Manuscripts with complete sets of illustrations, tables, captions, etc., should be submitted electronically to the chief editor (lml@geus.dk).

The main text with references and figure captions should be in Word format, figures should be in either pdf, jpeg, or tiff format, and tables should be in Excel or Word format. Word tables should be ordinary text files with tab-spacing between table columns; Word’s ‘table function’ is discouraged. Compare published articles for table layout.

Manuscripts will be reviewed by two referees; suggestions of referees are welcome. The final decision on whether or not a manuscript will be accepted for publication rests with the chief editor, acting on the advice of the scientific editors. Articles will be published in the order in which they are accepted and produced for publication.

Manuscript
Language – Manuscripts should be in English. Authors who are not proficient in English should ask an English-speaking colleague for assistance before submission of the manuscript.
Title – Titles should be short and concise, with emphasis on words useful for indexing and information retrieval. An abbreviated title to be used as running title may also be submitted.

Abstract – An abstract in English must accompany all papers. It should be short, factual, and stress new information and conclusions rather than describing the contents of the manuscript. The abstract should be self-contained and written in a way that makes it possible to understand the main points of the content without reading thewhole article. An abstract should not exceed 250 words.

Main text – Use 1.5 or double spacing throughout, and leave wide margins. Italics should be used only in generic and specific names and in some Latin abbreviations (e.g. c, et al., ibid., op. cit).

Spelling – Geological units named after localities in Greenland, formal lithostratigraphical units and intrusions named after localities in Greenland remain unchanged even if the eponymous locality names have since been changed in accordance with modern Greenlandic orthography.

References to figures, tables and papers – References to figures and tables in the text should have the form: Fig. 1, Figs 1-3, Table 3 or as (Smith 1969, fig. 3) when the reference is to a figure in a cited paper.

References to papers are given in the form Smith (1969) or (Smith 1969). Combined citations by different authors are separated by a semicolon; two or more papers by same author(s) are separated by commas. Citations are mentioned chronologically and then alphabetically. Use ‘et al.’ for three or more authors, e.g. Smith et al. (1980).

Reference list
Use the following style:

Setting – Danish letters a, æ and å (aa) are treated as ae, a and a (aa), respectively.

References are sorted by:
1: Alphabetically by the first author’s surname.
2: Papers by one author: two or more papers are arranged chronologically.
3: Papers by two authors: alphabetically after second author’s name. Two or more papers by the same two authors: chronologically.
4: Papers by three or more authors: chronologically.

Authors themselves are responsible for the accuracy and completeness of their references. The reference list must include all, and only, the references cited in the paper (including figures, tables, etc).

Illustrations
May be prepared in either black and white or colour. There is no colour charge. Horizontal illustrations are much to be preferred. Size of smallest letters in illustrations should not be less than 5.5 pt. Remember scale.
All figures including photographs should be submitted in electronic form ready for direct reproduction, i.e. having the dimensions of the final figure with a standard resolution of 300 dpi for photographs. Preferred formats are pdf, tiff and jpeg.
Size – The widths of figures must be 82 mm, 120 mm or 170 mm. Maximum height is 223 mm.
Captions – Captions to figures and plates must be delivered on separate pages, preferably at the end of the manuscript.

Supplementary data files
Supplementary files are accepted. Such files may provide e.g. analytical data tables, detailed data documentation, illustrations with special effects, or videos.

Proofs
Authors receive page proofs of the article after technical production. The cost of any alterations against the final manuscript will be charged to the author.
